MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC OVERVIEW:

The economic slowdown bottomed out last year. A spell of global financial turbulence caused capital outflows and pressure on the exchange rate, but strong policy measures stabilized the currency, rebuilt reserves and narrowed the excessive current account deficit. India's GDP growth for 2013-14 has been about 5% and at the same levels as that of the previous financial year. In the last five years, the growth rate of the economy has been lower than the estimates, but the industry is hopeful of a rebound with a new stable government.

With the opening up of foreign direct investment (FDI) in several sectors, India today is an eye-catching destination for overseas investors, who are competing for a greater role in the Indian market. The World Bank has projected an economic growth rate of 5.7% in FY 2015 for India due to more competitive exchange rate and several significant investments going forward.

INDIAN ELECTRICAL EQUIPMENT INDUSTRY

Indian electrical equipment industry, has shown some signs of revival, after a negative growth of 7.8% in production in 2012-13. The industry has a diversified, matured, established and strong manufacturing base, with robust supply chain, fully equipped to meet the domestic demand and capacity additions. Indian Electrical equipment industry is expected to play a vital role in improving power availability and power infrastructure, the vital inputs for development of the economy. If the economy is to grow at 8% p.a. over the next 20 years, it has been estimated that the country will need to increase power generation capacity by about four times by 2032. Domestic demand, coupled with increase in exports, has managed to keep the industry afloat. The industry is focusing on exports of Made in India electrical products and progressing towards making India a global sourcing hub for electrical equipment.

TRANSFORMER INDUSTRY:

The Transformer industry is an integral part of the country's electrical equipment industry. The Indian transformer industry has grown by leaps and bounds for over five decades and has a well matured technology base up to 800 kv class and going upto 1200 kv class. However, the Power Transformer Industry is going through a sluggish phase and has been affected with lower capacity utilization and price realization. It continues to face tough competition from the Chinese manufacturers. However, with the continuous support from the government to promote the power transformer industry through investments, tax benefits, subsidies, etc. will help the industry to grow over the coming years.

The Indian Power transformer market is well established, with significant sales being made to the utilities, industrial, and commercial segments within the country and has a strong foothold in the overseas market. This market has witnessed compounded Annual Growth Rate (CAGR) of 8% in the past 5 years. With the upswing demand for reliable power in the country, the transformer market is witnessing a growth trend.

FUTURE PROSPECTS: TRANSFORMER INDUSTRY

- The new BJP-led stable government, after 30 years of coalition ruling, with decisive mandate and clear majority will boost the confidence of the industry both at the domestic and global level and also for the foreign investors. The major reforms are aimed at infrastructure and power sector growth and the industry is optimistic that the new government will provide a conducive investment environment. The Government of India in the present era has also shifted its focus to the transmission & distribution sector of the country, which is expected to offer abundant growth opportunities for the players operating in the electrical equipment market of India.

- The Transformer market revenues in India are expected to grow at the CAGR of 14 % till 2018. Under the 12th five year plan (2012-2017), the government plans to spend 200 billion on developing and strengthening power infrastructure in India.
- Further, Restructured Accelerated Power Development and Reforms Programme (RAPDRP), the Rs. 515 billion union government flagship programme, aims to reduce Aggregate Technical and Commercial Losses (AT&C) losses of state utilities to 15% or below, which in turn has led to an increased demand for new equipment.
- The Indian government expects to add another 85,000 MW of power capacity during the 12th Five-Year Plan (2012-2017) period. The demand for power Transformers is also expected to go up as a direct consequence. Government's attempt of attaining 100% electrification across the country by 2017 would contribute to the demand for power transformers.
- Power transformers with a rating of 100 MVA to 500 MVA are expected to continue dominating global demand and accounted for over 73% of the overall market volume in 2013. It is also expected to be fastest growing segment, at an estimated CAGR of 6.4% in terms of revenue from 2014 to 2020.
- Asia Pacific accounted for over 40% of the market in 2013; it is also expected to grow at the fastest CAGR of 6.6% in terms of revenue from 2014 to 2020. Growing population as well as increasing demand for electricity is expected to fuel the market in this region over the forecast period.

OPPORTUNITY IN EXPORTS:

The Indian transformer industry is gradually gaining prominence in developed markets on the basis of its quality and pricing. The domestic transformer industry, which is fairly well established developing all type of transformers upto the 800kv and 1200 kv levels, has the potential of becoming the manufacturing hub for the supply of transformers in foreign markets.

The industry is currently exporting about 10% of their production. In Power equipment, transformers are one of the most fragmented segments, with numerous SME's involved in the manufacturing of transformers. The transformer segment exports to more than 50 countries including the US, Europe, South Africa, Cyprus, Syria, Iraq and the Far East countries.

IMP POWERS LIMITED

IMP Energy Ltd., Subsidiary of IMP Powers Ltd.

There is a clear thrust for renewable energy mainly through wind and solar. Mega plans for the same are under preparation. Renewable energy will be the source of all future electricity production in the world and hence, the demand for the renewable energy will go up.

Thus your company's Subsidiary, IMP Energy Ltd. (IEL), incorporated with a clear objective to explore emerging opportunities in micro and small Hydro Power Sector, is also comfortably placed. IEL received 13 small Hydro projects orders totalling 12.7 MW & amounting to Rs. 137.01 crore in Leh and Kargil, the progress of which is satisfactory. We expect to commission 2 in Kargil and 2 in Leh in this calendar year only.

STRENGTHS:

- Approved and Class 'A' Supplier in Almost all State Power Utilities (SEB's) in the Country.
- IMP has well equipped manufacturing unit at Silvassa for manufacturing transformers with Installed Capacity of 12,000 MVA per annum and is proud to manufacture Transformers upto 315 MVA, 400 KV Class.
- In-house facilities for manufacturing OLTC & RTCC.
- IMP with a more than five decades of experience, has about 30,000 installations/customer base in India and in about 20 countries across the world catering the requirements of Utilities, SEB, PSU and Private Industries.
- IMP is the only TRANSFORMER Company in India which is entitled for sales tax exemption till 2017.
- Well-established and known BRAND

WEAKNESS AND MANAGEMENT PERCEPTIONS:

- The industry is highly working capital Intensive.
- Over dependency on State Power Utilities
- Shortage of skilled manpower.
- ***Raw material, the key input and real cost driver:***

The raw materials like copper, transformer oil, steel stampings and aluminium are subject to price fluctuations, which may affect operating margins. Especially there are large fluctuations in copper prices.

CRGO Import is a big challenge because of the compulsory BIS Certification since September, 2013 for most of the grades to be consumed within India. This has led to some price increase.

OPPORTUNITIES:

- The new governments plans to fund up to 75% of the investment required to supply electricity through separate feeders for agricultural and rural domestic consumption, which will benefit the Power Sector Companies and ultimately the transformer manufacturers.
- With the government's commitment to provide 24x7 uninterrupted power supply to all homes and Deendayal Upadhyaya Gram Jyoti Yojana for feeder separation which will be launched to augment power supply to the rural areas will strengthen sub-transmission and distribution systems and ultimately boost the demand for Power Transformers.
- As Transformers are an indispensable component of an alternate current (AC) electrical system for electricity generation, transmission or distribution, the demand for transformers increases proportionately with the amplification of power generation, transmission or distribution networks in the country.
- With T&D companies actively striving to reduce aggregate technical and commercial (A&TC) losses, the demand for energy efficient transformers would get a boost.
- Increased spending on electrification and rising power demands, the Electrical equipment manufacturers are likely to get benefitted The major power addition programmes like, Restructured Accelerated Power Development and reforms Programme (R-APDRP) and Rajiv Gandhi Grameen Vidhutikaran Yojana (RGGVY) scheme and transmissions projects have been the major drivers of growth in electricity generation/ transmission and are bolstering the demand for electrical equipment segment. Government's attempt of attaining 100% electrification across the country by 2017 would contribute to the demand for power transformers.
- The Initiatives undertaken by the Indian Government, alongwith the need of replacement of transformers installed in the earlier years is expected to drive the growth in the Indian Transformers market.

- The global power transformers market is expected to reach USD 18.55 billion by 2020. Growing energy demand, on a global level, is expected to be the key driving force for the power transformers markets over the next six years.

THREATS AND MANAGEMENT PERCEPTIONS:

- The Transformer industry is going through a sluggish phase and has been worst affected with lower capacity utilization and price realization. It continues to face tough competition from the Chinese manufacturers.

- **Impact of Imports:**

The domestic industry is "facing non-market competition on account of cut throat below-cost entry level prices and large scale imports from China and Korea especially above 400 kv

The Transformer Industry heavily depends on imports especially in the extra high-voltage (EHV) segment. Also, the industry growth is increasingly coming under pressure due to the growing competition from foreign manufacturers and investment slowdown.

A surge in the imports of cheap and inferior quality electrical equipment from abroad is significantly impacting the Indian Electrical Equipment Industry with under-utilisation of recently enhanced capacities across several products.

Fluctuation of Raw material Prices-

Volatility in prices of key raw materials such as steel and copper is expected to be barrier for industry growth. On account of volatility of prices maintaining profits margins while manufacturing products is a challenge for Industry participants for the orders having fixed prices.

Rupee depreciation has made critical imported raw material and inputs for electrical equipment industry costly and lead to low margins. Companies which have a higher share of fixed-price contracts are highly vulnerable to these fluctuations.

- Indian Industry suffers from various structural disadvantages such as power cuts, multiple taxation, high cost of funds, non adherence to payment terms by customers, mainly power utilities resulting in unmanageable cashflow problems across the industry and delay in project clearance etc., which further erode their competitiveness vis-à-vis imports.

Difference between the actual results and estimates are recognized in the period in which the results are known /materialized.

3. Fixed Assets :

Fixed Assets are stated at cost of acquisition (net of Cenvat and VAT wherever applicable) or construction less accumulated depreciation and impairment loss, if any. Cost includes any directly attributable cost of bringing each asset to its working condition for intended use. Assets under installation or under construction and intangible assets under development as at balance sheet date are shown as capital work in progress together with project expenses and advances to suppliers/contractors

5. Impairment of Assets:

An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value based on an appropriated discount factor. The impairment loss recognized in the prior accounting years is reversed if there has been a change in the estimate of recoverable amount.

6. Investments:

Current investments are carried at the lower of cost or quoted/fair value, computed category-wise. Long term investments are stated at cost and provision is made for any diminution in such value, which is not temporary in nature.

The deferred tax asset is recognized and carried forward only to the extent that there is a virtual certainty that the asset will be adjusted in future.

14. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

15. Contingent Liabilities & Provision:

Claims against the Company not acknowledged as debts are treated as contingent liabilities. Provision in respect of contingent liabilities if any, is made when it is probable that a liability may be incurred and the amount can be reasonably estimated.

- (1) The IMP Powers Ltd filed Company Petition No.395 of 2006 before the Hon'ble High Court of Judicature at Bombay seeking approval of CDR Scheme under Section 391 to 394 of the Companies Act, 1956. The said Petition was allowed by the Hon'ble High Court of Judicature at Bombay. The Greater Bombay Co-operative Bank Ltd. challenged the said Order by filing Company Application No.966 of 2007. By an Order dated 22nd April, 2009 the Hon'ble High Court of Judicature at Bombay allowed the said Company Application filed by The Greater Bombay Co-operative Bank Ltd. The said Order is challenged by IMP Powers Ltd by filing an Appeal being Appeal No.409 of 2009 before the Hon'ble High Court of Judicature at Bombay. The said Appeal is admitted by the Hon'ble High Court and is pending for final hearing. In the meanwhile, The Greater Bombay Co-operative Bank Ltd. sold 380000 shares pledged without notice to Party. The above amount is provided without prejudice to IMP Powers Limited's right and contentions in all pending matters and also without admitting that there is any debt admittedly due and payable to The Greater Bombay Co-operative Bank Ltd.

Note No. – 1: SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS FOR THE YEAR ENDED 31ST MARCH 2014.

A. SIGNIFICANT ACCOUNTING POLICIES

1. Basis of preparation of financial statements:

The financial statements are prepared under the historical cost convention on accrual basis and in accordance with Indian Generally Accepted Accounting Principles ("GAAP") as specified in Companies (Accounting Standards) Rules, 2006, provisions of the Companies Act, 1956 and comply with the Accounting Standards issued by the Institute of Chartered Accountants of India.

2. Use of Estimates:

The Preparation of the financial statements in conformity with the generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities as on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known /materialized.

3. Fixed Assets :

Fixed Assets are stated at cost of acquisition (net of Cenvat and VAT wherever applicable) or construction less accumulated depreciation and impairment loss, if any. Cost includes any directly attributable cost of bringing each asset to its working condition for intended use. Assets under installation or under construction as at balance sheet date are shown as capital work in progress together with project expenses and advances to suppliers/contractors.

4. Depreciation:

Depreciation in respect of all assets acquired up to 30th June, 1985 is provided on 'Written Down Value' method. For additions on or after 1st July, 1985 Straight Line Method of depreciation has been adopted. The rates charged are as specified in Schedule XIV of the Companies Act, 1956.

5. Impairment of Assets:

An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value based on an appropriated discount factor. The impairment loss recognized in the prior accounting years is reversed if there has been a change in the estimate of recoverable amount.

6. Investments:

Current investments are carried at the lower of cost or quoted/fair value, computed category-wise. Long term investments are stated at cost and provision is made for any diminution in such value, which is not temporary in nature.

7. Valuation of Inventories:

- a. Raw Materials including consumables and stores are valued at lower of Cost and net realizable value. Cost is arrived on FIFO Basis.
- b. Semi-finished and Finished Goods are valued at cost of materials together with relevant factory overheads or net realizable value whichever is lower. Due consideration is given to the saleability of the stock and no obsolete or unserviceable/damaged items are included.

- b. Commission on sales is accounted as and when accepted.
- c. Sales are recognized on dispatch of goods to customers and include sales value of goods and excise duty and other receipts connected with sales.
- d. Liability for Excise Duty on finished goods is accounted for as and when they are cleared from the factory premises.
- e. Customs Duty on goods lying in Customs Bonded Warehouses is charged in the year of clearance of the goods when it becomes payable.
- f. CENVAT benefit on total purchase is accounted for by reducing the purchase cost of the materials/fixed assets wherever applicable.

9. Employee Benefits:

- a. Company's defined contributions made to provident fund of government are charged to profit & loss account on accrual basis.
- b. Contribution to Gratuity Fund and provision for Leave Encashment is based on actuarial valuation carried out as on the Balance Sheet date as per Projected Unit Credit Method.

10. Foreign Currency Transactions:

Foreign Currency transactions are accounted at the exchange rates prevailing on the date of transactions. Foreign currency current assets and current liabilities outstanding at the balance sheet date are translated at the exchange rate prevailing on that date and the resultant gain or loss is recognized in the profit & loss account. Also, in cases where they relate to the acquisition/construction of fixed assets, they are recognized in Profit & Loss accounts.

11. Borrowing Cost:

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets up to the date when they are ready for their intended use and other borrowing costs are charged to profit & loss account.

12. Operating Lease :

Assets acquired on lease where a significant position of risks and rewards of ownership are retained by Leasor are classified as Operating Lease. Lease rentals are charged to profit & loss account as incurred. Initial direct costs in respect of assets taken on operating lease are expensed off in year in which cost are incurred.

Assets given on lease where a significant position of risks and rewards of ownership are retained by Leasor are classified as Operating Lease. Lease rentals are credited to profit & loss account on accrual.

13. Taxation:

Provision for taxation is made on the basis of the taxable profits computed for the current accounting period in accordance with the Income Tax Act, 1961.

(1) The IMP Powers Ltd filed Company Petition No.395 of 2006 before the Hon'ble High Court of Judicature at Bombay seeking approval of CDR Scheme under Section 391 to 394 of the Companies Act, 1956. The said Petition was allowed by the Hon'ble High Court of Judicature at Bombay. The Greater Bombay Co-operative Bank Ltd. challenged the said Order by filing Company Application No.966 of 2007. By an Order dated 22nd April, 2009 the Hon'ble High Court of Judicature at Bombay allowed the said Company Application filed by The Greater Bombay Co-operative Bank Ltd. The said Order is challenged by IMP Powers Ltd by filing an Appeal being Appeal No.409 of 2009 before the Hon'ble High Court of Judicature at Bombay. The said Appeal is admitted by the Hon'ble High Court and is pending for final hearing. In the meanwhile, The Greater Bombay Co-operative Bank Ltd. sold 380000 shares pledged without notice to Party. In view of the above, there are multiple litigations pending among the Parties before DJR, Mumbai, Cooperative Court, Mumbai and City Civil Court, Mumbai. Apart from the above Appeal, there are claims and counter claims which are yet to be adjudicated between the Parties. Therefore, as an abundant caution the Company has provided provision for interest as well as balance principle amount on the basis of CDR Scheme approved by the Hon'ble High Court of Judicature at Bombay subject to the final outcome of all pending litigations. The above amount is provided without prejudice to IMP Powers Limited's right and contentions in all pending matters and also without admitting that there is any debt admittedly due and payable to The Greater Bombay Co-operative Bank Ltd.
